

LISTING OF THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (currently amended) A system for disseminating an electronic material over a network, the system comprising:

a list defining module that defines a list of ~~at least one intended recipient~~ a plurality of intended recipients of the electronic material;

an electronic materials receiving module that receives and stores the electronic material from a user to be transmitted to the at least one intended recipient on a site processor;

a properties association module that defines properties to be associated with the electronic material;

a generate and send message module that provides a message to the ~~at least one intended recipient~~ plurality of intended recipients, wherein the message includes a first hyperlink that each of a plurality of actual recipients of the message receives;~~to the electronic material;~~ and

an internet web site that is hosted by the site processor, wherein the internet web site is presented to an actual recipient when the first hyperlink is selected in the message by the actual recipient, and further wherein the internet web site includes a second hyperlink that, when selected, provides access to the electronic material; and

a system tracking module that tracks whether ~~the~~ at least one of the plurality of intended recipients receive ~~recipient receives~~ the electronic material.

2. (original) The system of claim 1, further comprising a user management module that is used by the user to allow additional users to disseminate at least one of the electronic material and other electronic material.

3. (original) The system of claim 2, wherein the user management module provides various levels of authorization for the additional users.

4. (original) The system of claim 1, wherein the electronic material comprises at least one of annual reports, bank books, compliance documents, litigation-related materials, mutual fund related information, Preliminary Official Statements, private placements, prospectuses, proxy statements, registration statements and research reports.

5. (currently amended) The system of claim 1, further comprising a project module that identifies the message, the electronic material and the ~~at least one~~ plurality of intended recipient recipients with a unique project name.

6. (currently amended) The system of claim 5, wherein the project module further enables a user to duplicate at least one of the message, the electronic material and ~~an identifier~~ respective identifiers of the ~~at least one~~ plurality of intended recipient recipients associated with the unique project name.

7. (currently amended) The system of claim 1, wherein the message further includes a second hyperlink to a Preliminary Official Statement.

8. (original) The system of claim 1, wherein the message includes a control for forwarding the message to another intended recipient when the party who receives the message is not one of the at least one intended recipient.

9. (currently amended) The system of claim 1, wherein the list includes ~~at least one~~ respective e-mail address-addresses for the ~~at least one~~ plurality of intended recipient recipients.

10. (currently amended) The system of claim 9, further comprising a checking module that tests the ~~at least one e-mail address-addresses~~ for accuracy.

11. (currently amended) The system of claim 10, wherein the ~~at least one e-mail address-addresses~~ are is-accurate when the ~~at least one e-mail address-addresses~~ comply ~~complies~~ with formatting standards.

12. (original) The system of claim 1, wherein the list defining module further receives electronic e-mail list information, the e-mail list information representing intended recipients and e-mail addresses thereof.

13. (original) The system of claim 12, wherein the list defining module creates an e-mail list based on the electronic e-mail list information.

14. (currently amended) A method for disseminating an electronic material over a network, the method comprising:

defining a list of ~~at least one intended recipient~~ a plurality of intended recipients of the electronic material;

receiving and storing the electronic material from a user to be transmitted to the at least one intended recipient on a site processor;

defining properties to be associated with the electronic material;

generating and sending a message to the at least one intended recipient, wherein the message includes a first hyperlink that each of a plurality of actual recipients of the message receives; ~~to the electronic material; and~~

providing by the site processor an internet web site, wherein the internet web site is presented to an actual recipient when the first hyperlink is selected in the message by the actual recipient, and further wherein the internet web site includes a second hyperlink that, when selected, provides access to the electronic material; and

tracking whether ~~the~~ at least one of the plurality of intended recipients receive ~~recipient receives~~ of the electronic material.

15. (original) The method of claim 14, further comprising enabling the user to allow additional users to disseminate at least one of the electronic material and other electronic material.

16. (original) The method of claim 15, wherein the step of enabling includes providing various levels of authorization for the additional users.

17. (original) The method of claim 14, wherein the electronic material comprises at least one of annual reports, bank books, compliance documents, litigation-related materials, mutual fund related information, Preliminary Official Statements, private placements, prospectuses, proxy statements, registration statements and research reports.

18. (currently amended) The method of claim 14, further comprising identifying the message, the electronic material and the ~~at least one~~plurality of intended ~~recipient~~recipients with a unique project name.

19. (currently amended) The method of claim 18, further comprising duplicating at least one of the message, the electronic material and ~~an identifier~~respective identifiers of the ~~at least one~~plurality of intended ~~recipient~~recipients associated with the unique project name.

20. (original) The method of claim 14, wherein the message further includes a hyperlink to a Preliminary Official Statement.

21. (original) The method of claim 14, wherein the message is an e-mail message.

22. (currently amended) The method of claim 21, wherein the e-mail message includes a control for forwarding the e-mail message to another intended recipient when the party who received the e-mail is not one of the ~~at least one~~plurality of intended ~~recipient~~recipients.

23. (currently amended) The method of claim 14, wherein the list includes ~~at least one~~ respective e-mail ~~address~~addresses for the ~~at least one~~plurality of intended ~~recipient~~recipients.

24. (currently amended) The method of claim 23, further comprising testing the ~~at least one~~ e-mail ~~address~~addresses in the list for accuracy.

25. (currently amended) The method of claim 24, wherein the ~~at least one~~ e-mail ~~addresses~~ isare accurate when the e-mail ~~addresses~~ compliescomply with formatting standards.

26. (currently amended) The method of claim 14, further comprising receiving electronic list information, the electronic list information representing the plurality of intended recipients and respective e-mail addresses therefor.

27. (original) The method of claim 26, wherein the list is based on the electronic list information.

Claim 28 (canceled).

29. (currently amended) A system for disseminating an electronic material over a network, the system comprising:

an e-mail list defining module that defines an e-mail list of ~~at least one~~ a plurality of e-mail ~~address~~ addresses of an intended ~~recipient~~ recipients of the electronic material;

an electronic materials receiving module that receives and stores the electronic material from a registered user to be transmitted to the ~~at least one~~ plurality of intended ~~recipient~~ recipients on a site processor;

a properties association module that defines properties to be associated with the electronic material;

a generate and send e-mail message module that provides an e-mail message that includes a first hyperlink that each of a plurality of ~~to the at least one intended actual recipient~~ recipients receive, wherein the e-mail message includes a hyperlink to the electronic material;

an internet web site that is hosted by the site processor, wherein the internet web site is presented to an actual recipient when the first hyperlink is selected in the message by the actual recipient, and further wherein the internet web site includes a second hyperlink that, when selected, provides access to the electronic material;

a system tracking module that tracks whether at least one of the plurality of intended ~~recipient receives~~ recipients receive the electronic material; and

a signature management module that provides at least electronic signature to be appended to the e-mail message.

30. (currently amended) A method for disseminating an electronic material over a network, the method comprising:

defining an e-mail list of ~~at least one~~ a plurality of e-mail address addresses of an intended ~~recipient~~ recipients of the electronic material;

receiving and storing the electronic material from a registered user to be transmitted to the ~~at least one~~ plurality of intended ~~recipient~~ recipients on a site processor;

defining properties to be associated with the electronic material;

generating and sending an e-mail message that includes a first hyperlink that each of a plurality of ~~to the at least one intended recipient~~ actual recipients receive, wherein the e-mail message includes a hyperlink to the electronic material;

an internet web site that is hosted by the site processor, wherein the internet web site is presented to an actual recipient when the first hyperlink is selected in the message by the actual recipient, and further wherein the internet web site includes a second hyperlink that, when selected, provides access to the electronic material; and

tracking each of the plurality of ~~recipient's~~ recipients' reception of the electronic material.
